Subject: Microsoft

Please realize that Microsoft has and still is manipulating the public and businesses everyday. With no real choice in computing platforms, we are at there mercy. By making software unstable unless the company plays by Microsoft's rules we the public are cheated out of some very great and useful software. I could continue for days, but I will stop here and say. PLEASE PUNISH MICROSOFT TO THE FULL EXTENT OF THE LAW! Anything less will be a travesty of justice.

Thank you
Respectfully
Greg Heck
